BSI METHOD (BROAD SWEEPS OF IMAGINATION): A NEW METHOD TO TEACH A FOREIGN LANGUAGE TR-2011-028-001

We welcome you to join our session beginning in October 2011 in Istanbul, Turkey. The BSI Training Course is open to all teachers involved in all stages of pre-primary, primary secondary & university education or teacher advisers with a similar professional profile (i.e. related to foreign language teaching).

The BSI Training Course is part of the broader BSI program, originally developed in Turkey, which was accepted as an EU Comenius Multilateral Project in 2007 and has been tested and developed in four countries (Bulgaria, Italy, Romania and Turkey) during the last two years.

BSI combines several approaches and techniques in an integrated set and has developed a new technique ("clumsy pictures") to teach a foreign language to beginners of all ages.

BSI has proven particularly effective in

- creating a nice and relaxed atmosphere in class
- keeping enthusiasm alive among learners
- making the students active and eager to learn
- developing communicative skills

Broad Sweeps of Imagination

The aim of the BSI Method is to inspire teachers to use more creative and communicative language activities in order to prepare the learners to use language effectively both inside and outside the learning environment. The underlying understanding is that after creating an atmosphere replete with the use of imagination, the students will better adapt themselves to use language in context without even being aware of the learning process.

In addition to its effectiveness for communicative foreign language learning, the BSI training course fosters multicultural awareness, intercultural competencies and respect towards the values of the other cultures, integrating these into the learning process. Course participants will be able to reflect on their experiences and motivations, thus helping to create a more enthusiastic learning atmosphere.
